Team Management & Consulting

UPSTREAM

MIDSTREAM

DOWNSTREAM

Team Management & Consulting LLC is a leader in project management, decommissioning and abandonment, turnaround, tank and terminal, commissioning and startup, pipe structural design, inspection and construction installation services in the energy industry.

Through a network of experienced employees, the company provides project management services for upstream, midstream and downstream projects worldwide.

Team Management recruits, trains and maintains a seasoned staff of professional project support personnel. These professionals share a commitment to providing innovative ideas and exceeding clients' expectations.

If you need a quality job completed on time and on budget, integrate our experts into your team to keep an operation running smoothly and safely.

We Bring the

UPSTREAM

Team Management provides project and construction management services to the exploration and production sector across the globe and in many diverse environments.

Our consultants are trained in the latest industry standards and are ready to aid in commissioning and startup efforts, perform inspections, manage construction installations and provide a wealth of turnaround services.

Upstream onshore services provided include:

- *Land men and land owner negotiations*
- *Permitting and regulatory support*
- *AFE forecasting and bid evaluation*
- *Well site and right away identification and survey*
- *Manage well site preparation for drilling program*
- *Detailed design of process facilities, compressors and pipelines*
- *Procurement of process equipment and materials*
- *Equipment bid package preparation*
- *Onsite supervision and inspection*
- *Production supervisors and field operations*
- *Process trouble shooting*

Whether it's a land-based operation in the Marcellus Shale play, ultra-deep water off or in the North Sea, we provide the experience crucial to get the job done on time and on budget.

Expertise to Your

MIDSTREAM

Once we help you find it, we can help with your marketing, transportation and storage requirements. In the midstream sector, we specialize in gathering systems, compressor and pump stations and metering systems.

Other midstream services include:

- *New pipeline design and construction oversight*
- *Facilities design, construction oversight and inspection*
- *Facilities, metering and pipeline commissioning*
- *All state regulatory and DOT compliance support*
- *Complete pipeline maintenance and rehabilitation programs*
- *Conventional, smart pigging and rehab programs*
- *Rehab excavation and repair oversight*
- *Corrosion assessments*
- *Maintenance and construction installation procedures*

We're there to help you after the find, too, to keep your investment secure and your operation moving ahead.

Team

DOWNSTREAM

Team Management and Consulting provides a number of services to the downstream refining and terminal distributor. Services range from brownfield construction support, turnaround management, tank inspection and rehabilitation and onsite supervision and inspection.

For the downstream industry, we provide:

- *Project management, project controls staffing*
- *AFE forecasting, contractor evaluations*
- *Site construction management teams*
- *Certified welding inspectors*
- *NACE inspection*
- *Certified API 510, 650 and 653 Inspectors*

Team Management has a proven track record of planning and executing spot-on forecasting of turnaround downtime.
